

HERTFORDSHIRE DISPLAY plc

Environmental Policy

Introduction

Hertfordshire Display plc is a printing company, operating from a site in Ware, Hertfordshire. Our business is the on-demand printing of documents, manuals, club magazines, business and personal stationery in black or full colour. We also offer full colour posters (large format), plan printing and ancillary finishing services. We recognise that these operations result in emissions to air, releases to land and water and the generation of waste.

Scope

This environmental policy is underpinned by the planning, implementation and control of the Company's EMS which encompasses the business activities of the printing operation on the Ware site including management, office services, production, delivery and procurement.

Objectives

The following objectives have been agreed by management to help reduce the environmental impacts of our business:

- to comply to applicable legal requirements and those external stakeholder requirements which the Company chooses to accommodate;
- to continually improve our systems;
- to operate in an environmentally responsible manner to prevent pollution;
- to reduce utility consumption;
- to reduce carbon emissions through careful vehicle selection and journey planning;
- to reduce the amount of waste going to landfill by segregating (pre-treating) waste on-site.

Appropriate targets and/or indicators are set, against which, progress in meeting these objectives can be measured and monitored by management. Results are reviewed in regular meetings. Audits are also undertaken to ensure compliance to BS EN ISO 14001:2004.

Responsibilities and resources

The Managing Director and the Environmental Representative are responsible for ensuring that this policy is maintained and fully implemented. They also ensure that resources are available and the necessary training given to achieve our objectives. Employees are encouraged to be proactive and develop their own ideas for improvements as they also have a responsibility to ensure that the objectives of this policy are met.

Communications

A copy of this environmental policy is available on request. It is also available for download from www.hdprint.co.uk/news.htm where there is also a link to a blog where further information is available.

If you wish to discuss our progress against our objectives, please telephone 01920 461191 and ask for the Environmental Representative.

Signed:

John Watkins,
Managing Director
